

PRODUCT

CHARACTERISTICS

- Non-buffering to gastric pH, helping maintain acidity for optimum protein digestion
- Non-reactive to vitamins—resulting to unimpaired vitamin bioavailability
- Non-precipitative in intestinal pH—does not form intestinal distress causing magma
- Excellent mineral bioavailability (>90%) for enhanced productive and reproductive functions
- Stable and soluble in a wide range of pH, mixtures and mixing processes

*as compared to standard inorganic mineral supplements

FERTILITY PACK

CHELATED MINERAL SUPPLEMENT BLEND FOR SWINE GESTATING, BOAR AND REPLACEMENT RATIONS

FERTILITY PACK is a high bioavailability mineral supplement blend specifically designed to support increased physiological and metabolic activities of genetically improved stocks

FERTILITY PACK contains 4th generation “true chelates”*, produced in a three stage chelation process, achieving complete chelation of the metal with amino acid ligands, assuring maximum solubility/absorbability, non-reactivity with vitamins and other nutrients in the gut, and non-buffering to gastric pH.

FERTILITY PACK is exclusively formulated to provide the critical microminerals necessary for optimum reproductive tract development and maintenance leading to enhanced fertility .

* to differentiate from “dry blends” and complexes

CONTENTS/KG

Iron amino acid chelate 100 gms, Copper aa chelate 20 gms, Zinc aa chelate 80 gms, Manganese aa chelate 45 gms, selenium aa chelate 8 gms; carrier and freeflow agents q.s.

INDICATION

Mineral supplement for swine gestating, boar and replacement rations

DOSAGE

1/2 to 1 kg/ton of feed.

For best results, this product is intended to replace standard inorganic trace mineral supplements.
